

LAAWOL DIGITAL

Business Onboarding Guide

Setting up and running your business on Laawol

Business console · business.laawoldigital.com

Version 1.0 · August 2026

What's in this guide

1. Before you start

What Laawol does and what you'll need

2. Applying to join

The application form, on the web and in the app

3. Signing in

Reaching your dashboard

4. Business identity and verification

Getting approved to trade

5. Choosing your services

Turning on only what you offer, and the rules each one needs

6. Your office locations

Where customers can drop things off

7. Destinations and pricing

Where you ship and what you charge

8. Getting paid

Connecting Stripe, platform fees, and who covers card charges

9. Your team

Adding staff and limiting what they can reach

10. Today — your daily view

What needs attention right now

11. Vehicle sales

Listings and purchases

12. Barrels and freight

The shipping queues

13. Car transport

Winning jobs by quoting

14. Container tracking

Required before a load can move

15. Notifications

How you find out something happened

16. Reviews, support, and growth

Feedback, customer cases, and your plan

17. What your customers see

The Laawol mobile app

1 • Before you start

Laawol connects customers who want to ship barrels and freight, buy vehicles, move cars, or park them, with the businesses that provide those services. You work from the **business console** in a web browser. Your customers use the Laawol mobile app or the customer website.

Have these ready before you begin:

- The email address you want to sign in with — it becomes the owner account
- Your business licence or authority documents as PDFs or photos (up to 20 MB each)
- Your bank details, for the payout account you'll connect
- The countries you serve and the prices you want to charge

Work through sections 4 to 9 in order. Each one depends on the one before it: you can't take orders until you're approved, and you can't be paid until your payout account is connected.

2 • Applying to join

You apply once. Until a Laawol administrator approves you, customers can't see your business — so the application is the gate to everything else in this guide.

There are two ways in, and they create the same application:

WHERE	HOW TO GET THERE
The website	Go to <code>laawoldigital.com</code> and choose List your business
The mobile app	On the sign-in screen, choose Register your business

The owner account

The first section creates the login you'll use to manage the business. Use an address you'll keep — it becomes the owner account, and the owner is the only role that can later invite staff or change payout settings.

FOR BUSINESSES

List your business on Laawol

Apply once, choose the services you offer, and prepare your operations. Customers see your business after platform approval.

Owner account

Create the login you'll use to manage your business.

Full name *

At least 6 characters.

Confirm password *

laawoldigital.com → List your business — the owner account section

Services and business profile

Next you tick the services you can provide and describe the business itself. Everything here is what the platform reviews, so the *Tell us about your service* box is worth filling in properly — routes, pricing, and experience all help your application through.

The screenshot shows the LaawolDigital application form. At the top left is the LaawolDigital logo, and at the top right is a hamburger menu icon. Below the header, there are four service cards, each with a checked checkbox and a description:

- Barrel shipping**: Ship barrels to destination countries.
- Car sales**: Publish cars so customers can browse and buy them.
- Car parking**: Manage parked cars and parking receipts.
- Car transport**: Track vehicle transport requests.

Below these cards is the **Business profile** section, which includes a sub-header and a description: "This is what the platform reviews. Customers only see approved businesses." The form fields in this section are:

- Business name ***: A text input field.
- Business phone**: A text input field with the placeholder "Phone number".
- Business email**: A text input field with the placeholder "Optional".
- Website**: A text input field with the placeholder "https:// (optional)".
- Business country ***: A dropdown menu with the placeholder "Select a country".
- Business city ***: A dropdown menu with the placeholder "Select a city".
- Tell us about your service**: A text input field with the placeholder "Routes, pricing, experience, anything useful for approval (optional)".

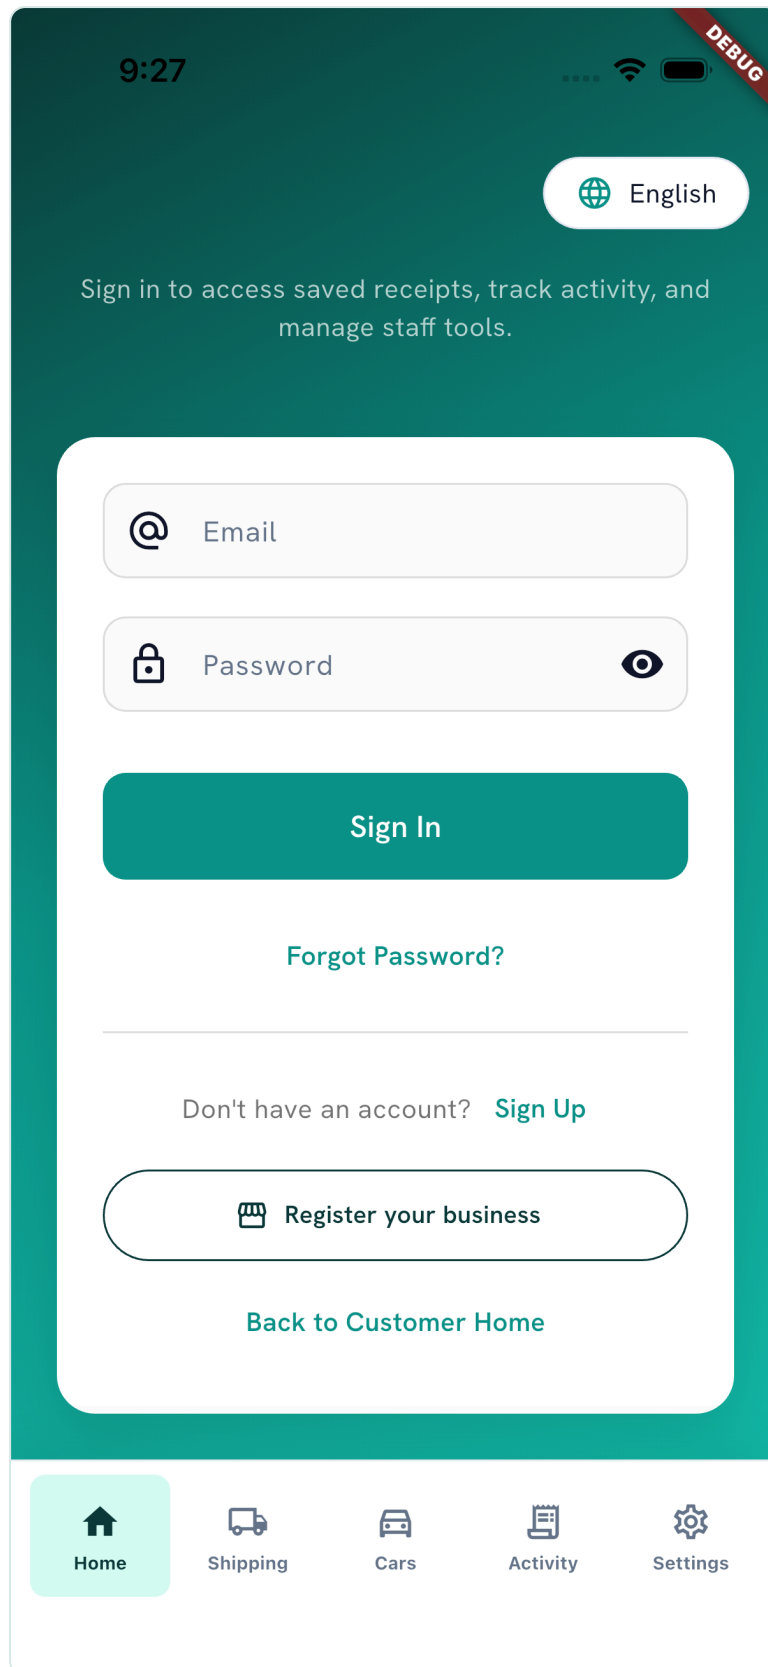

Services you offer and Business profile — all four services are ticked by default, so untick anything you don't provide

Applying for freight? Use the mobile app. The website's application form offers four services — barrel shipping, car sales, car parking, and car transport. Freight is not among them. The app's form includes it. If you apply on the website and later need freight, you can still turn it on from *Services & coverage* once you're approved.

Finally you accept the terms and confirm you understand that your business — not Laawol — is the party providing the service to the customer. Submit, and the application goes to a Laawol administrator for review.

Applying from the app

The app's form asks for the same three things in the same order, and adds a business profile picture — a logo or storefront image customers will recognise.

The app sign-in screen — *Register your business*

Confirm Password

Services you offer
Your dashboard will show pages for these

Join the marketplace — apply once, then go live when approved

3 • Signing in

Go to `business.laawoldigital.com` and sign in with your business email. You'll land on **Today**, your daily summary. Everything else is reached from the sidebar on the left, grouped into *Business setup*,

Vehicle sales, Transport & shipping, and Manage.

The **FR** button in the bottom-right corner switches the whole console to French. Anything you type stays as you typed it.

4 • STEP 1 Business identity and verification

Open **Business** under Business setup. This is where you tell Laawol who you are and prove you're allowed to trade.

Service note

What your business is known for...

Verification documents

Upload only the service documents Laawol admins need. Stripe collects identity, tax, legal, and bank details.

Stripe verification

Stripe has enabled this business for payouts. Laawol only needs to review service-specific documents.

Account: acct_1TxBhNERT6vdMMvd

Stripe verification complete

FR

Business → identity details and verification documents

Fill in your legal name, address, and contact details, then upload the documents for the services you intend to offer. You only need the documents that apply to you:

DOCUMENT	NEEDED IF YOU OFFER
Freight or shipping authority	Barrel shipping, freight
Dealer licence or sales authorisation	Car sales
Transport insurance and authority	Car transport
Parking facility proof	Car parking

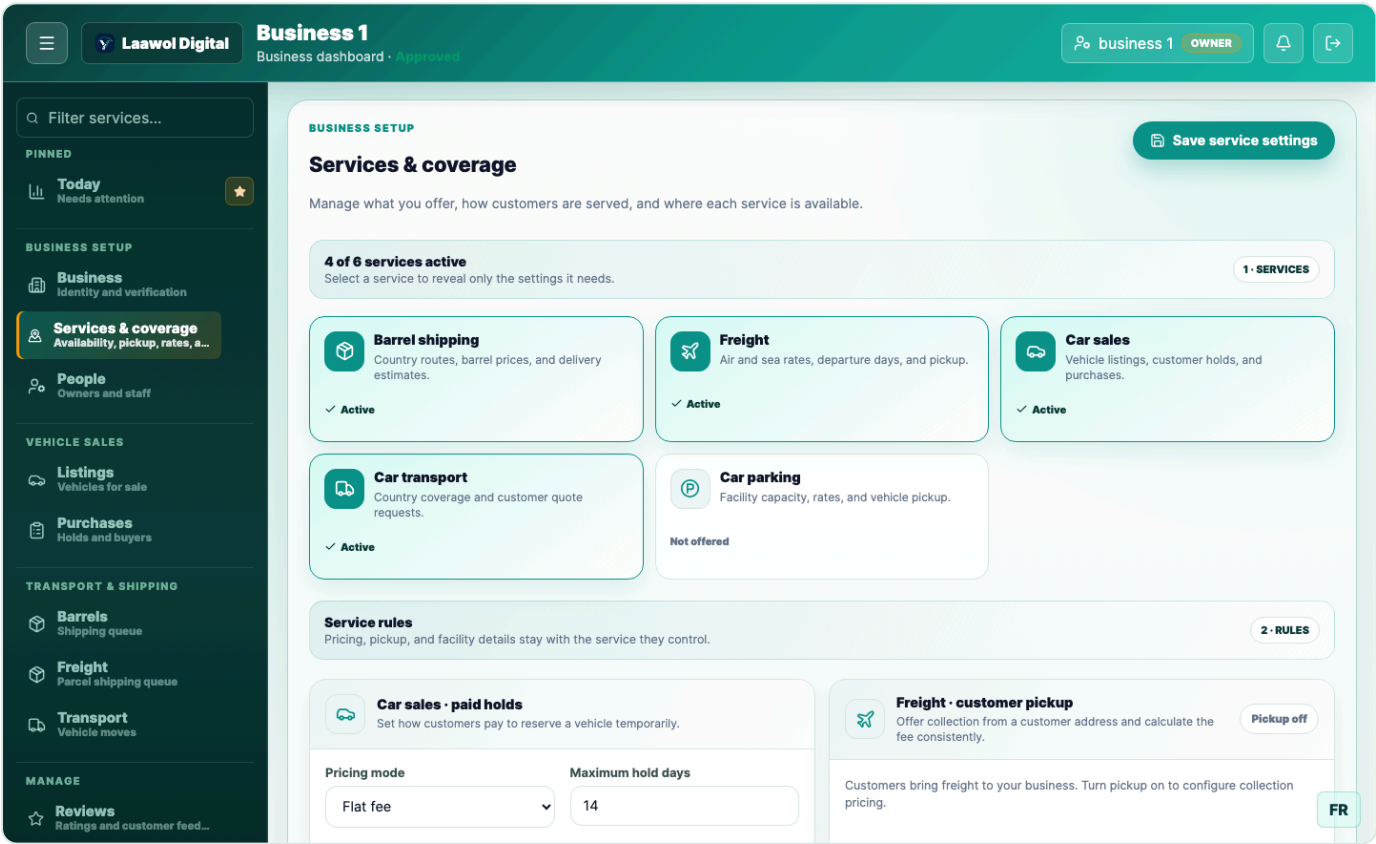

Each file can be up to 20 MB. Once uploaded, a document sits at *submitted* until a Laawol administrator reviews it and marks it *verified*.

Approval has **two** requirements, and documents are only one of them: your **Stripe payout account** (section 8) must also have finished verification. An administrator physically cannot approve a business whose Stripe setup is incomplete — so if approval seems slow, check the Stripe banner on Today first. Once both are done, the header next to your name changes from *Pending* to *Approved*.

Until you're approved, customers can't find you. You can configure everything else in the meantime, but your services won't appear to customers and you can't receive orders.

5 • STEP 2 Choosing your services

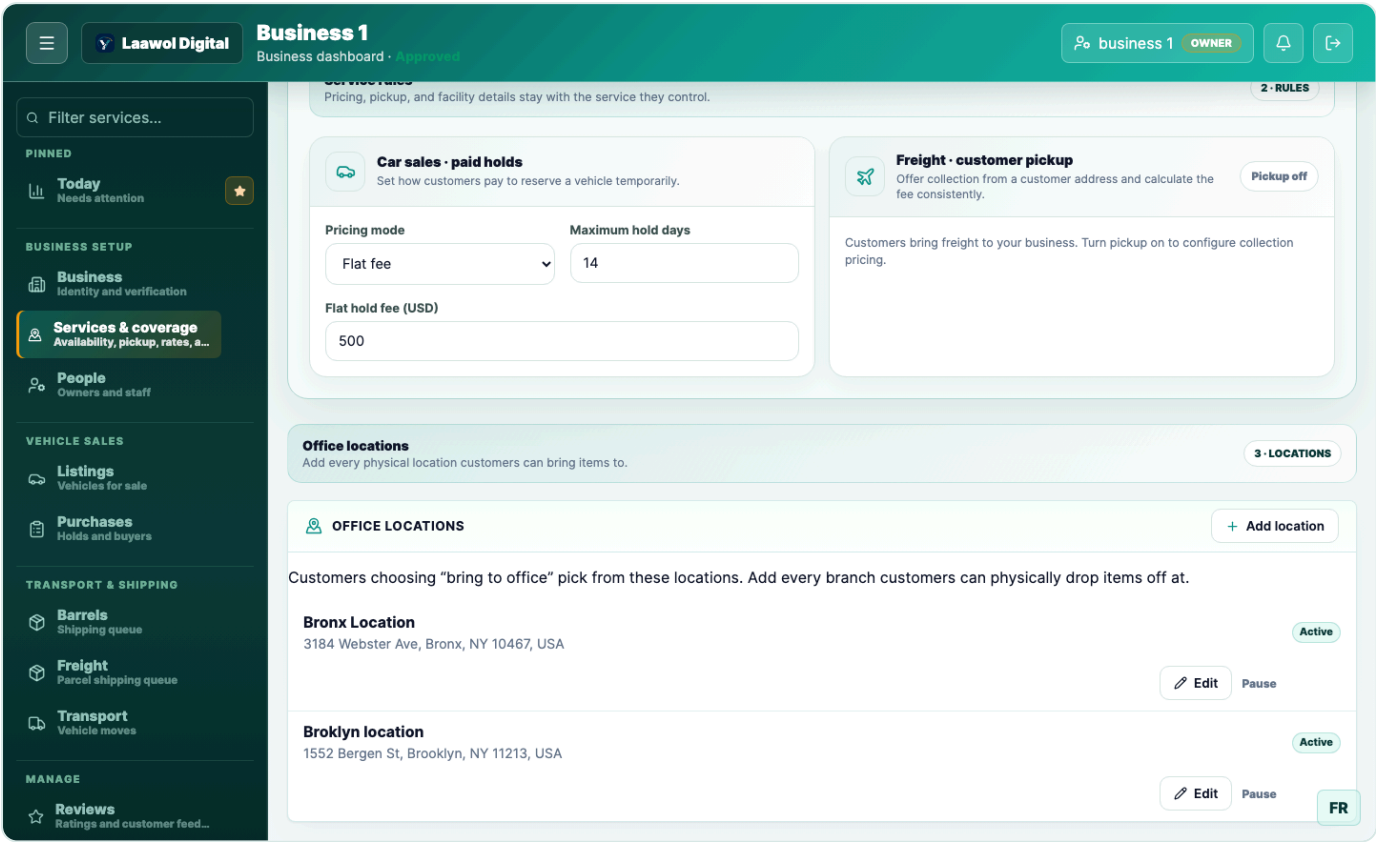

Open **Services & coverage**. Turn on only the services you actually provide — each one you enable adds setup work and exposes you to orders you'd have to fulfil.

Services & coverage — four of six services active in this example

SERVICE	WHAT IT MEANS FOR YOU
Barrel shipping	Customers send full barrels to a destination country you serve
Freight	Parcel shipping priced by weight, by air or by sea
Car sales	You list vehicles; customers reserve them with a paid hold
Car transport	You bid to move a customer's vehicle overseas
Car parking	You store vehicles at your facility for a daily or monthly rate

Selecting a service reveals only the settings it needs, under **Service rules** — for example paid-hold pricing for car sales, or whether you collect freight from a customer's address. A service shows *Not offered* until you turn it on.

Service rules — a \$500 flat hold fee held for up to 14 days on car sales, and freight pickup switched off

The two rules you are most likely to change:

RULE	WHAT IT CONTROLS
Car sales · paid holds	What a customer pays to reserve a vehicle, either a flat fee or a per-day rate, and how many days the hold survives before it lapses
Freight · customer pickup	With pickup <i>off</i> , customers bring freight to one of your offices. Turn it on to collect from their address and price the collection

6 • STEP 3 Your office locations

Anyone who chooses "bring it to the office" picks from this list, so add **every branch** a customer could physically walk into. A missing branch is a branch no customer can select.

COUNTRY	COVERAGE AND CUSTOMER RATES	DELIVERY	STATUS	ACTION
				FR

Office locations — two active branches customers can drop off at

Use **Pause** rather than deleting when a branch closes temporarily. Pausing hides it from customers while keeping it attached to the shipments already booked against it; deleting it breaks that link.

7 • STEP 4 Destinations and pricing

Still under Services & coverage, add each country you serve and set your prices per service. Coverage is **per service, per country** — you might ship barrels to Guinea and Senegal but only offer freight to Senegal.

Country coverage — three destinations, each with its own barrel price, air rate, and delivery window

For each destination you set:

- **Barrel shipping** — price per barrel and a delivery estimate range in days
- **Freight** — price per kilogram for air and for sea, plus the departure days you sail or fly
- **Car transport** — whether you cover that country at all

A price of zero means "not offered". If you leave the sea freight rate at zero, customers won't be offered sea freight to that country — the service simply won't appear for them.

8 • STEP 5 Getting paid

Laawol collects payment from the customer and passes your share to you. To receive money you must connect a payout account, which you'll be prompted to do from your dashboard. Until payouts are enabled, orders can still arrive but money can't reach you.

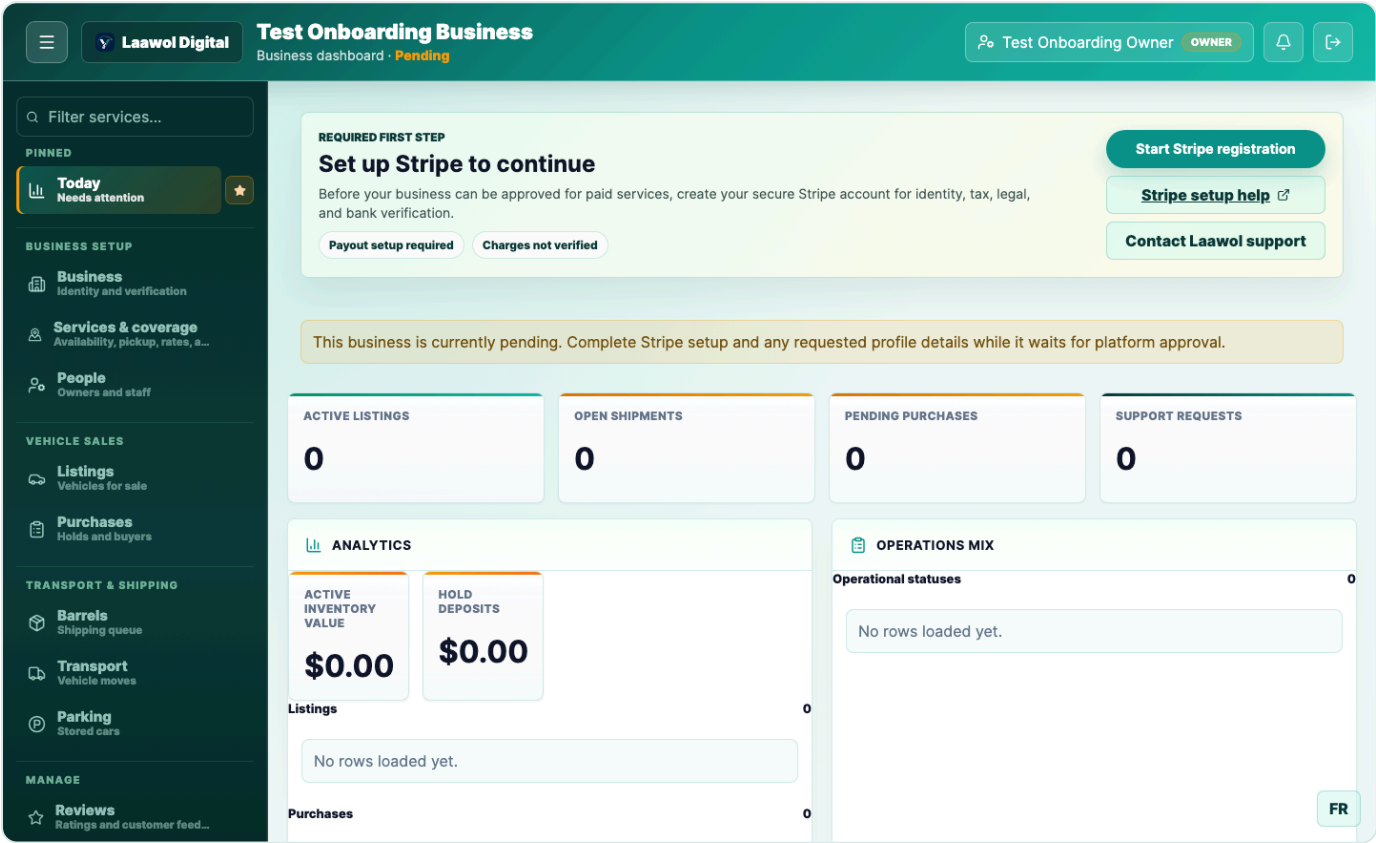

Three numbers govern every transaction:

TERM	WHAT IT IS
Gross received	What the customer paid in total
Platform fee	Laawol's commission, set per business and shown on your dashboard
Business earnings	What reaches you after the platform fee

There's also a setting for **who absorbs the card processing fee** — you or Laawol. If you absorb it, payments for your orders are charged directly on your connected account and the processing fee comes out of your share. Your dashboard states which applies under *Who pays Stripe's processing fee*.

Connecting your Stripe account — the walkthrough

Laawol pays you through **Stripe**. On a brand-new business, Stripe setup is the very first thing your dashboard asks for — a banner marked *Required first step* sits above everything else until it's done. Orders can still arrive before then, but no money can reach you, and your business **cannot be approved** until Stripe verification is complete.

A brand-new business's dashboard — *Set up Stripe to continue*, with payout setup and charge verification both outstanding

Choose **Start Stripe registration**. Stripe opens in the same tab and walks you through a short series of screens. Every screen below is from a real run of this flow.

1 · Contact details. Your email and mobile number — Stripe texts a verification code to that number, so use a phone you have with you.

Start verification

Skip for now

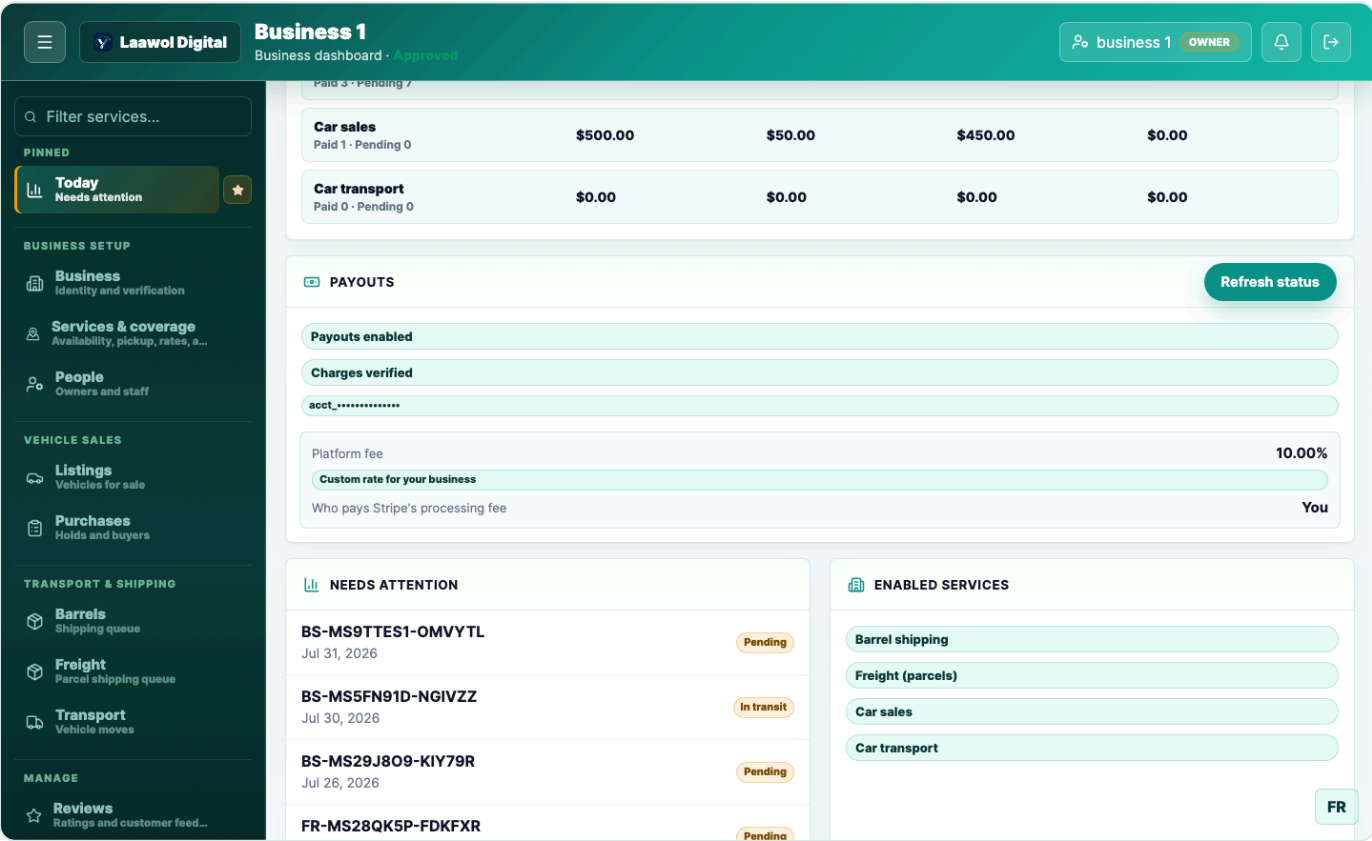

Verify your identity — upload a government-issued ID matching your details

Stripe may not finish in one sitting. If you leave anything incomplete, the console banner changes to *Finish Stripe setup to continue* and the button becomes **Continue Stripe setup**, which reopens Stripe exactly where you left off. Your account isn't fully live until both *Payouts enabled* and *Charges verified* show green.

Half-finished setup — connected but pending verification, with *Continue Stripe setup* to resume

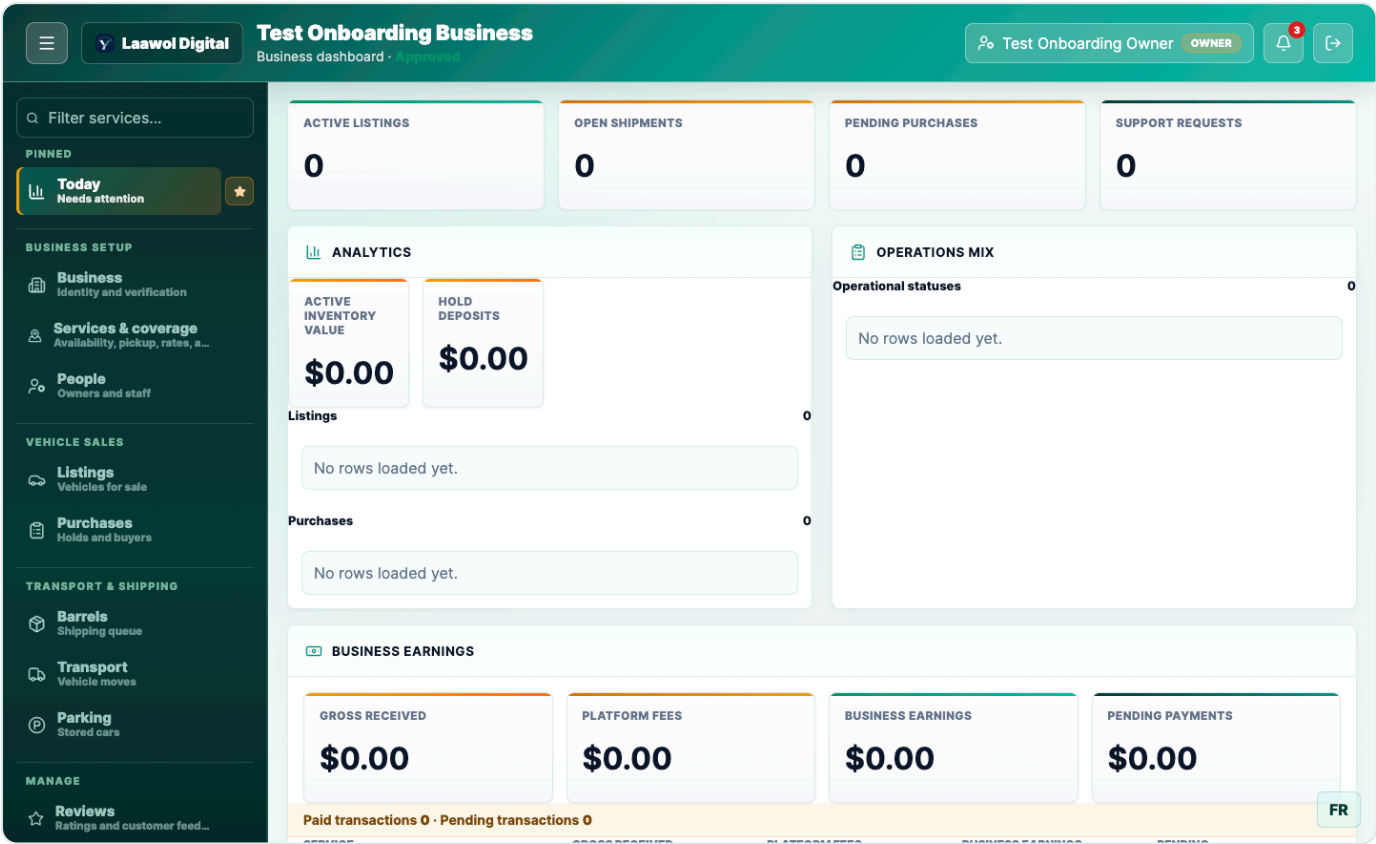

When Stripe finishes it returns you to the console automatically. This is what a fully connected Payouts card looks like:

Payouts, fully connected — payouts enabled, charges verified, a 10% platform fee, and this business absorbing Stripe's processing fee

What approval looks like

Once Stripe verification is complete and Laawol has reviewed your documents, an administrator approves the business. Your dashboard header changes from *Pending* to **Approved** — from that moment customers can see your business and place orders.

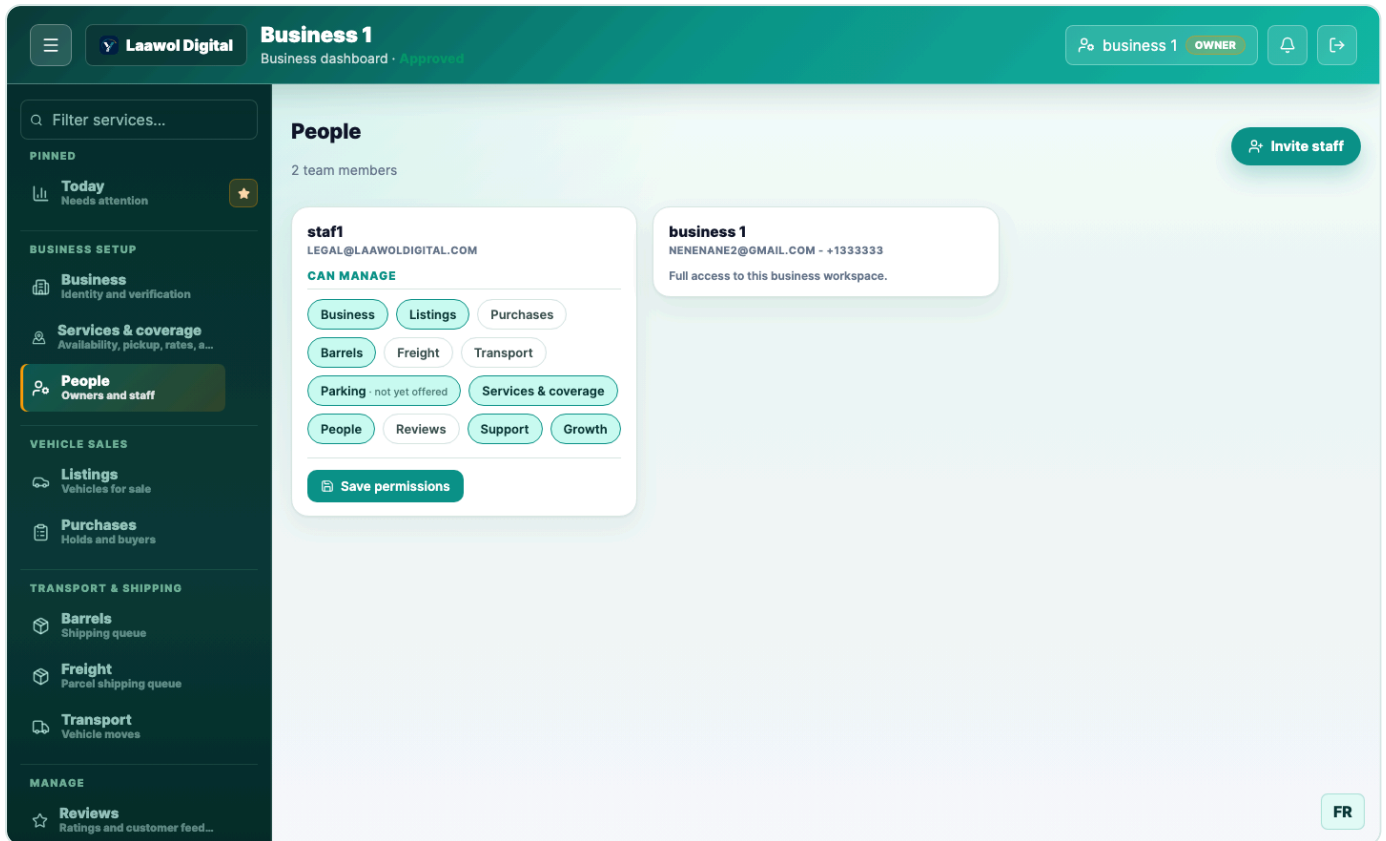

The same dashboard, minutes later — Approved and open for business

You give your bank details to **Stripe**, not to Laawol. Laawol never sees or stores your bank account or card details — the console only ever shows the status Stripe reports back, plus your account reference.

9 • STEP 6 Your team

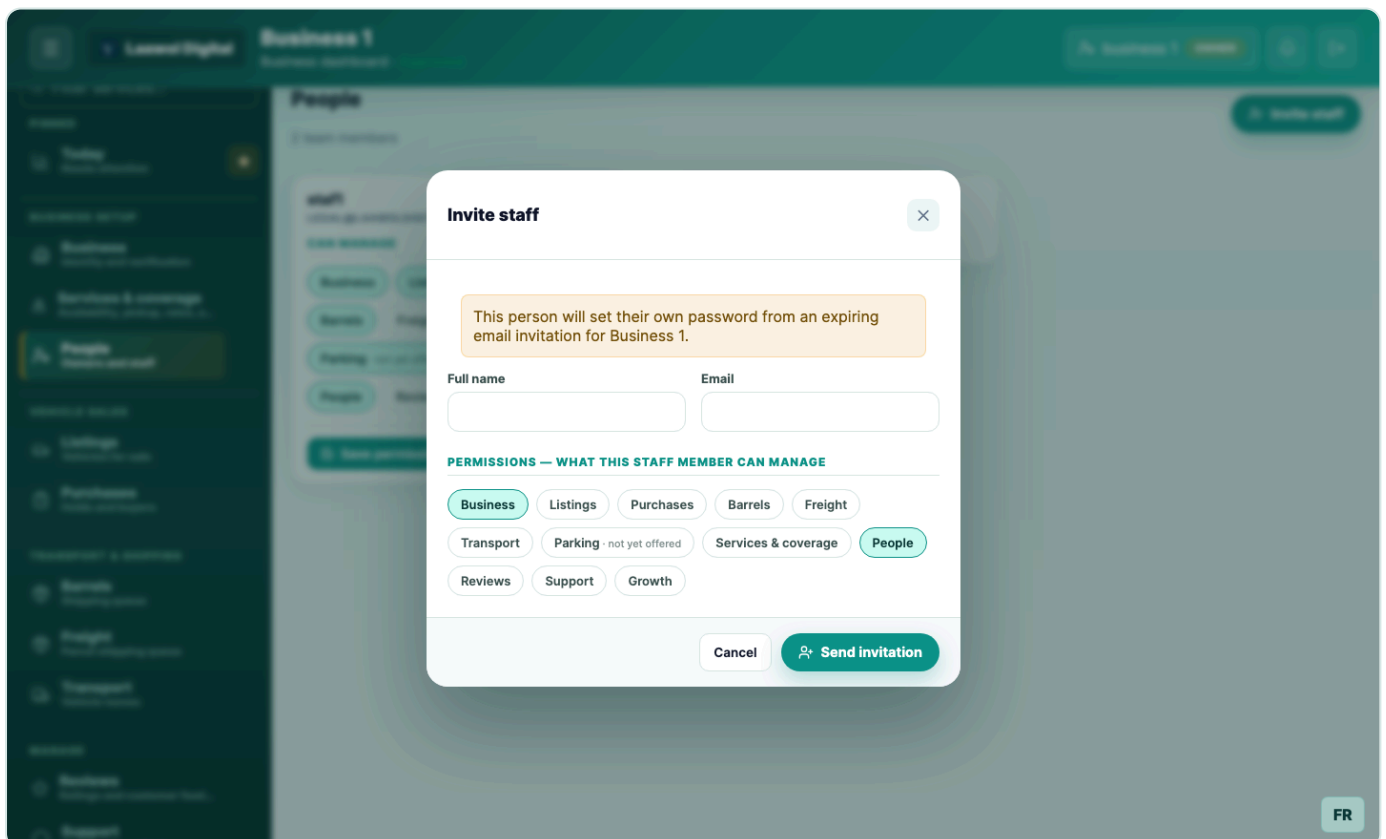

Open **People** to invite staff. Each person gets their own sign-in and only sees the sections you allow.

People — a staff member with per-section permissions

Inviting someone

Choose **Invite staff**, enter their name and email, then tick the sections they should be able to manage before sending.

Invite staff — name, email, and the sections this person can manage

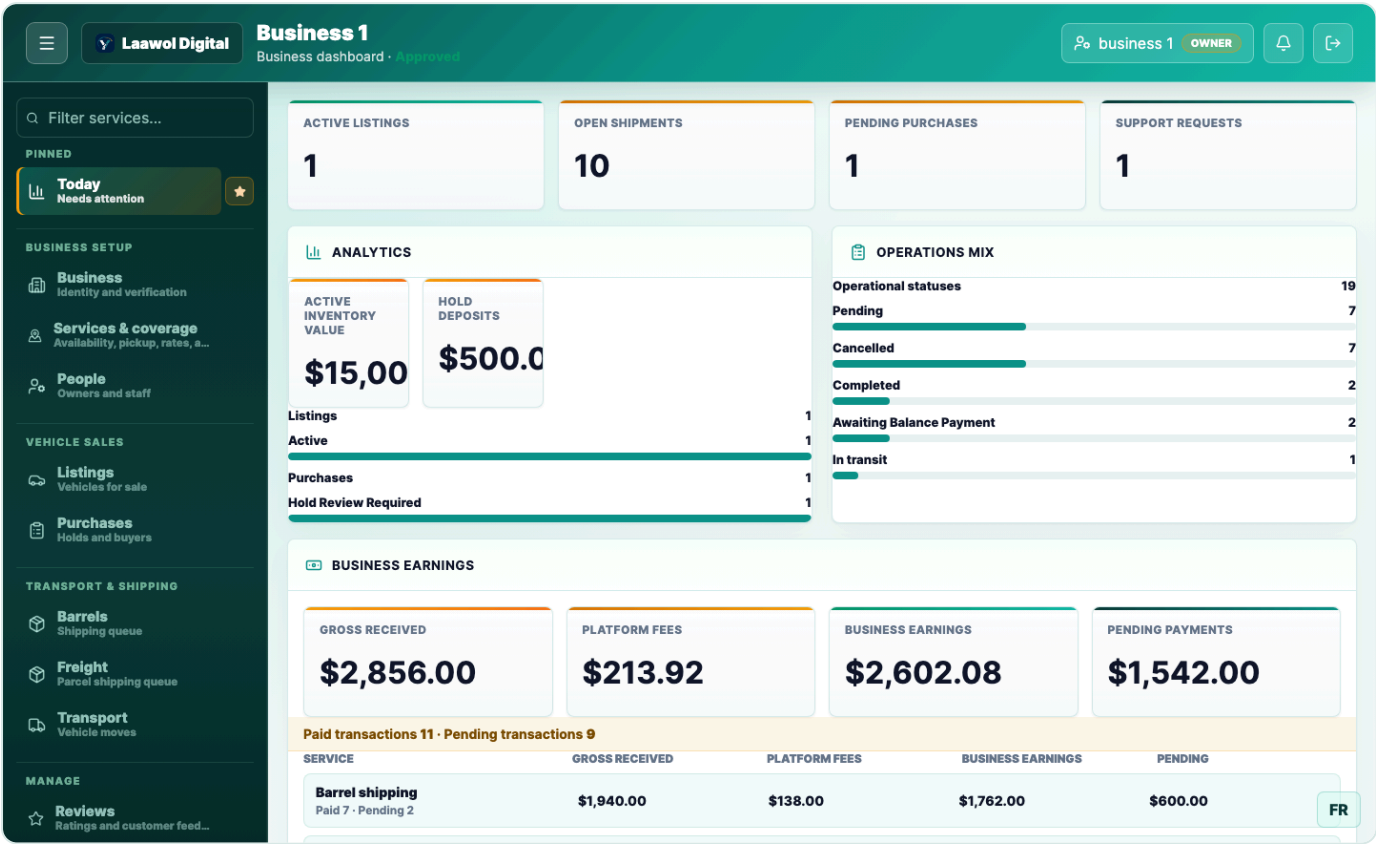

You never set or see their password. They receive an email invitation and set their own, and **that invitation expires** — if they leave it too long, invite them again rather than trying to reset it.

Permissions are per section: Business, Listings, Purchases, Barrels, Freight, Transport, Parking, Services & coverage, People, Reviews, Support, and Growth. Tick only what that person needs and press **Save permissions**. A service you don't offer shows as *not yet offered* and can't be granted.

The owner always has full access. Staff permissions apply to everyone else, so give warehouse staff the shipping queues without exposing pricing or payouts.

10 · Today — your daily view

Today is where you start each morning. It answers one question: what needs attention right now.

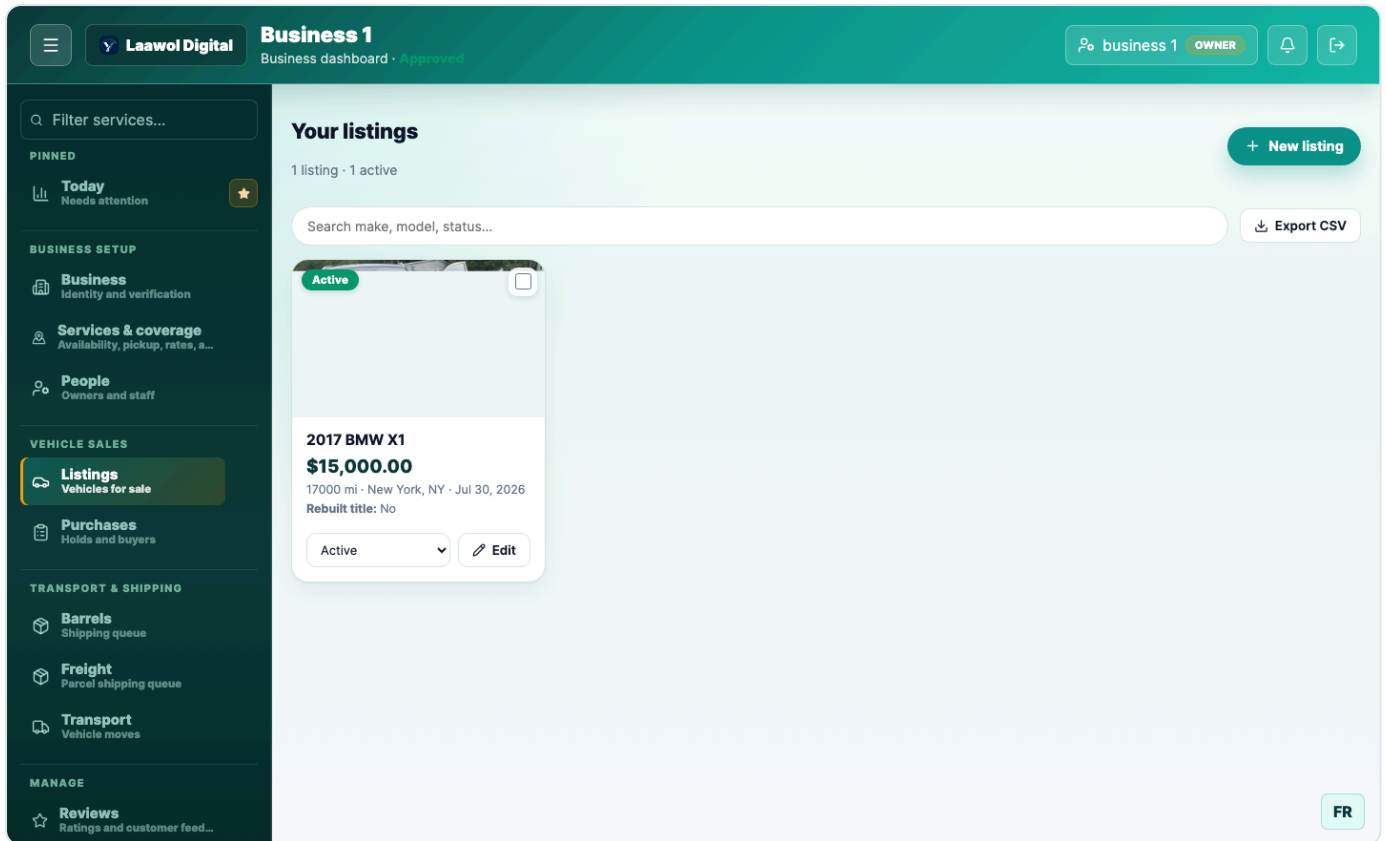

Today — counters, analytics, operations mix, and earnings

- **Counters** across the top — active listings, open shipments, pending purchases, support requests
- **Operations mix** — every order you have, grouped by status, so a growing "Pending" column tells you work is piling up
- **Business earnings** — gross, fees, your earnings, and money still pending, broken down per service
- **Needs attention** — the specific orders waiting on you

11 · Vehicle sales

Listings

Listings holds the vehicles you're selling. Use *New listing* to add one — make, model, year, condition, mileage, price, and photos. Each listing carries a **rebuilt title** status, which customers see before they reserve.

Listings — status moves through draft, active, reserved, sold

A listing's status moves *draft* → *active* → *reserved* → *sold*. Only **active** listings appear to customers. Use *Export CSV* to take your inventory into a spreadsheet.

Purchases

Purchases shows customers who have paid a hold deposit to reserve a vehicle. Review each one and either confirm the sale or release the hold. Deposits appear under hold deposits on your dashboard until resolved.

Freight — priced by weight, with balance settlement when actual weight differs

Freight is priced by weight. If the actual weight differs from what the customer declared, the difference is settled as a balance payment before the shipment can move on.

13 • Car transport

Car transport is a **bidding marketplace**, not first-come first-served. When a customer requests a vehicle move to a country you cover, the request appears in your **Transport** queue as an opportunity.

Transport — quote opportunities separated from jobs you've won

1. A request arrives and you're notified
 2. You **send a quote** — total price, estimated pickup and delivery dates, transport method, and your terms
 3. **The customer chooses** which quote to accept. You don't claim the job; you win it on price and terms
 4. Once selected, it becomes a job you move through *pending* → *scheduled* → *in transit* → *delivered*
- You can revise or withdraw a quote while the customer is still deciding. Each opportunity has a **quote deadline** — miss it and the opportunity closes.

"Scheduled" means booked, not moving. Use it once you've assigned a carrier and fixed a pickup date but the vehicle hasn't left. If that stage doesn't match how you work, go straight to *in transit*.

14 · Container tracking

Anything travelling in a container — barrels, sea freight, and cars — needs a **container number** before you can mark it *in transit*.

On each shipment card, find **Automated container tracking**. Enter the container, booking, or bill of lading number from your carrier, pick the carrier from the list, and press **Start tracking**. From then on, carrier milestones flow into the shipment automatically and your customer can follow it.

The system will not let you mark a load "in transit" without it. This is deliberate: in transit is the moment your customer starts asking where their goods are, and the container number is the only thing that can answer them. Air freight is exempt, since it has no container.

Pick your carrier from the list rather than typing its code. A mistyped carrier code doesn't fail loudly — tracking simply never starts. If your carrier isn't listed, choose *Another carrier* and enter its four-letter SCAC code.

15 · Notifications

The bell in the top-right tells you when something needs you. You'll be notified when:

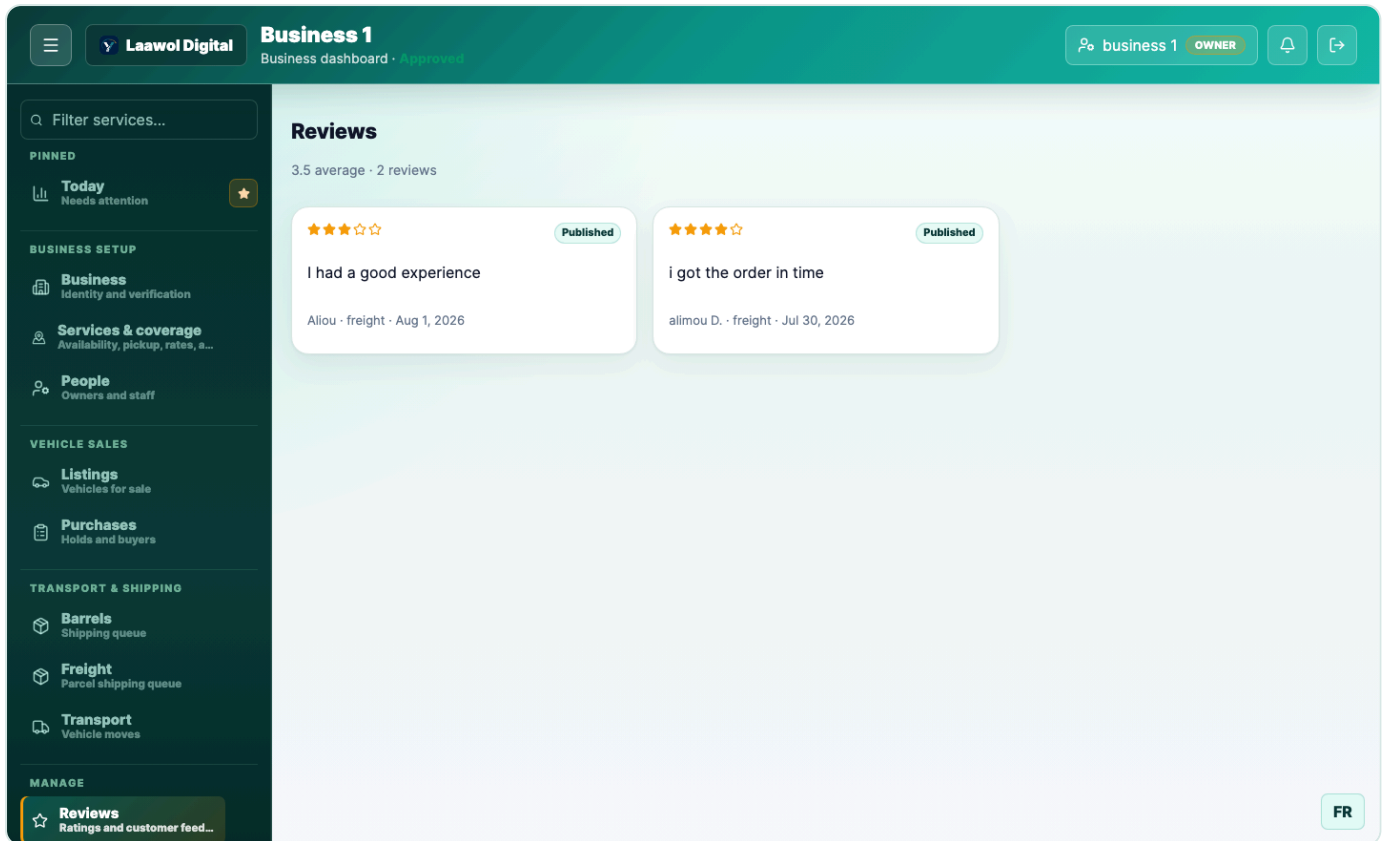

- **A customer pays** for any of your services — barrels, freight, car sales, parking, or transport
- **A new transport request** arrives that you're eligible to quote on
- **A customer messages you** through support
- **Your verification** is reviewed

Clicking a notification takes you straight to the order it refers to, not just to the section. You can also receive these as push notifications on your phone and by email; adjust that under your notification preferences.

16 · Reviews, support, and growth

Reviews

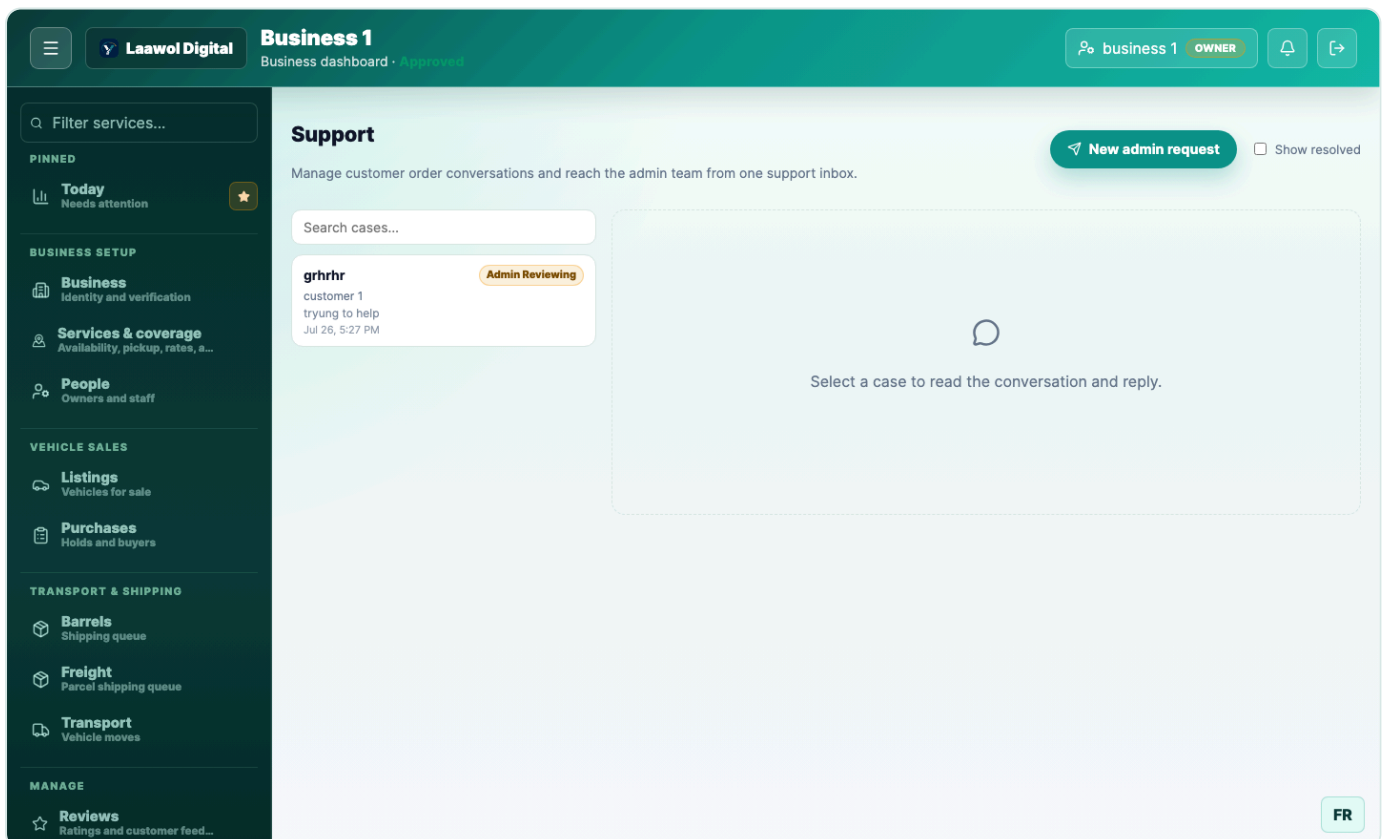

Customers rate you after a completed order. Your average rating and review count appear to customers when they're choosing a business, so this directly affects how much work you win. You can report a review you believe is abusive.

Reviews — ratings and customer feedback

Support

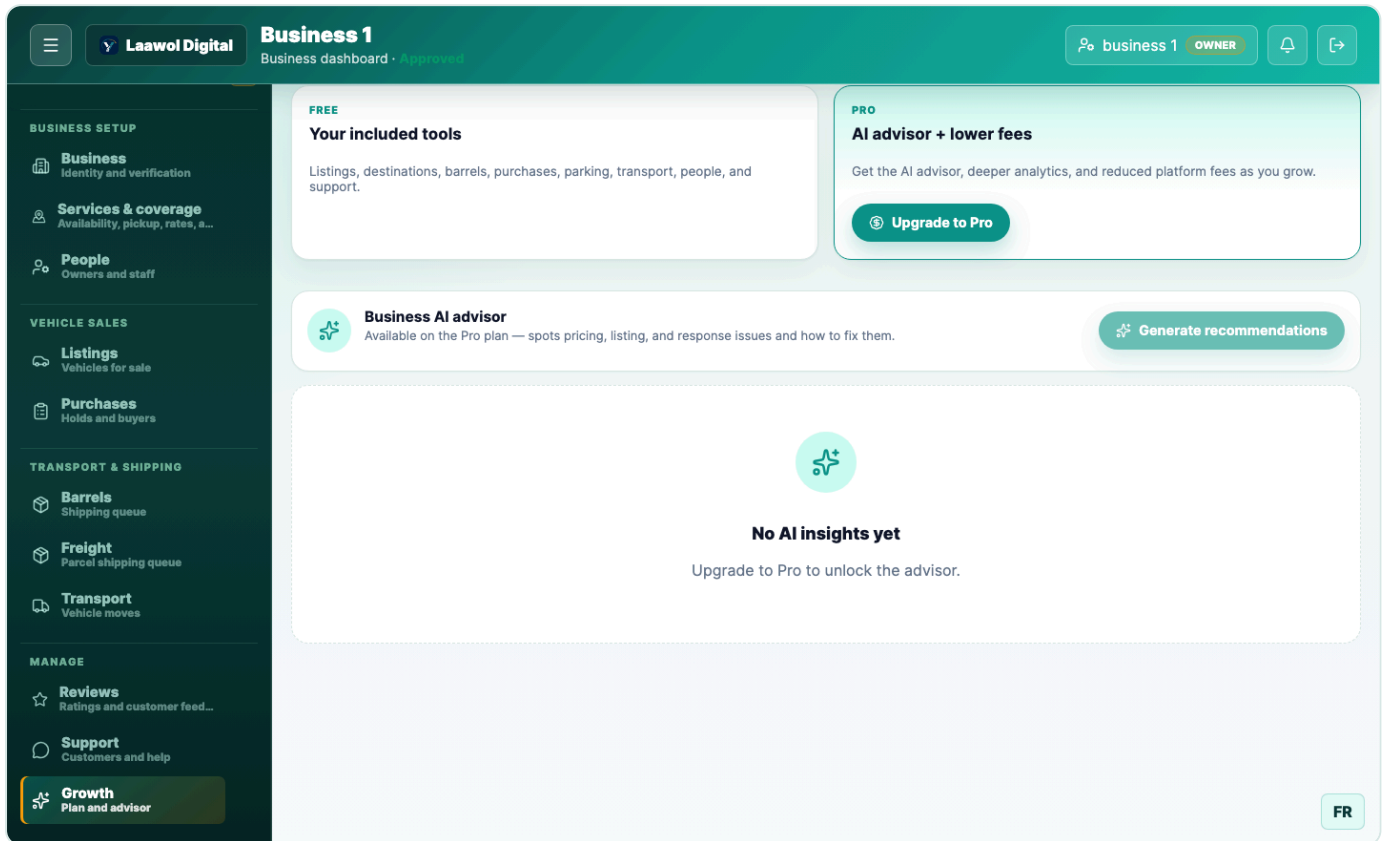

Support is your conversation with customers about specific orders. Each case is attached to the order it concerns, so you can see what they're referring to without asking.

Support — customer cases tied to specific orders

Growth

Growth shows which plan you're on and what changes if you move. Every operational tool in this guide — listings, destinations, barrels, purchases, parking, transport, people, and support — is on the **Free** plan. Nothing in your day-to-day work is behind a paywall.

Growth — the Free plan against Pro, with the advisor locked

Pro adds three things on top:

- **The business AI advisor** — it reviews your pricing, listings, and response times and tells you what's costing you work
- **Deeper analytics** beyond the totals on Today
- **Reduced platform fees** as your volume grows, so more of each order reaches you

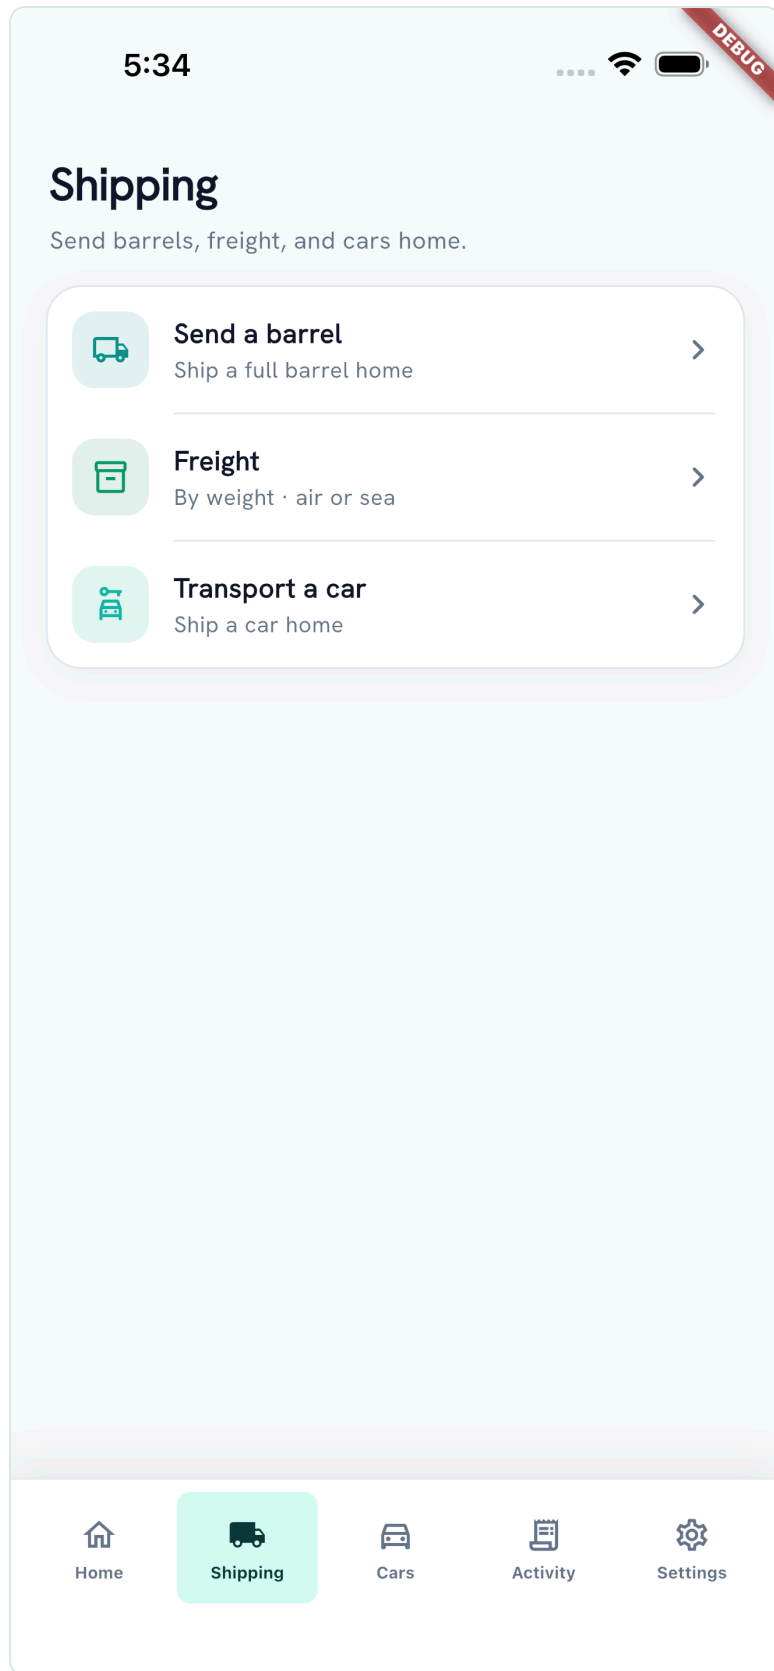

On Free, *Generate recommendations* is visible but the panel below stays empty — that's the advisor waiting on an upgrade, not a fault.

17 • What your customers see

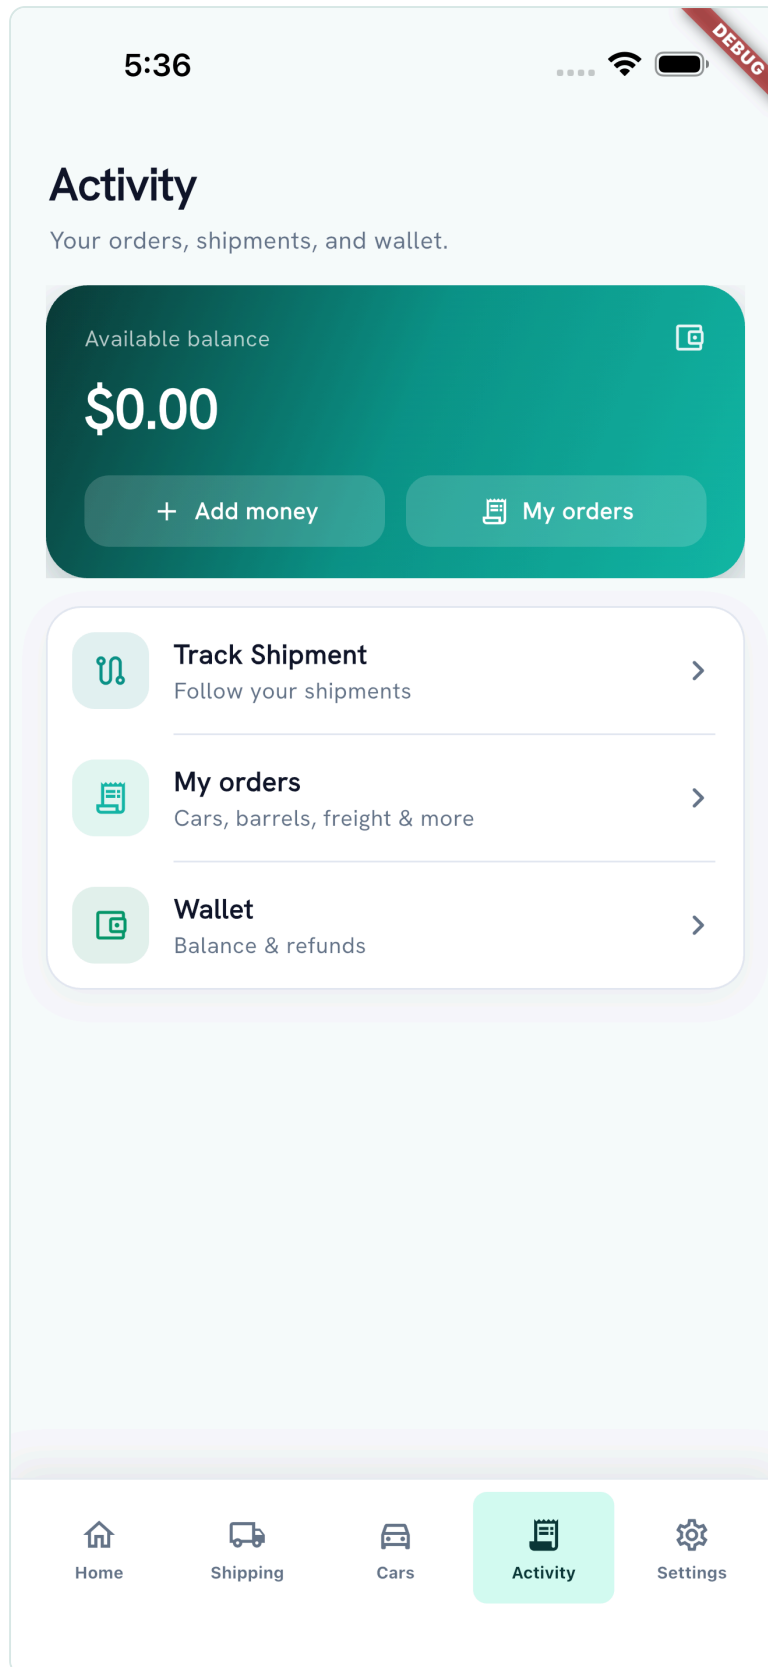

Your customers use the Laawol mobile app. Knowing what they see helps you understand what they're describing when they contact you.

Home — wallet balance and quick actions

Shipping — where customers start a barrel, freight, or transport request

Activity — every order the customer has placed, with its live status

The status you set in your queue is the status they see here. When you move a shipment to *in transit*, their Activity list updates immediately — which is why keeping statuses current cuts down on "where is my order" messages.

Quick reference

YOU WANT TO...	GO TO
See what needs attention	Today
Upload a licence or check approval	Business
Turn a service on or off	Services & coverage
Change a country price	Services & coverage → destinations
Add a staff member	People
Add a vehicle for sale	Listings → New listing
Approve a customer's hold	Purchases
Update a shipment's status	Barrels or Freight
Bid on a vehicle move	Transport → Send quote
Start container tracking	The shipment card in its queue
Answer a customer	Support

Need help? Raise a case in **Support** from your console, and the Laawol team will pick it up.
